DETAILED ACTION

1. Election/Restriction

A. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method of ex vivo expansion of stem cells using an IL-3, classified in class 435, subclass 7.2.
- II. Claims 10-18, drawn to a method of human gene therapy using IL-3 mutants, classified in class 530, subclass 350.
- III. Claims 19-26, drawn to a method of treating a patient with IL-3 by removing stem cells, classified in class 514, subclass 2.

B. The inventions are distinct, each from each other because of the following reasons:

Inventions I-III are independent and distinct, each from the other, because the methods are practiced with materially different process steps for materially different purposes and each method requires a non-coextensive search because of different starting materials, process steps and goals.

Furthermore, in order for Applicants' response to be fully responsive, in addition to the elected Group, Applicants are required to elect one SEQ ID NO to be searched.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
